

## **Kwik-Change™ Drinking Water Systems**

We now offer a complete line of filtration systems and components featuring the Kwik-Change™ cartridge as a low cost alternative to Reverse Osmosis (RO) drinking water systems.

Do you buy bottled water because your tap water doesn't taste as good? Or are you getting clean, clear, crisp drinking water right at home with a professionally installed Kwik-Change™ drinking water system from Watts? RO water is regarded by many to be the best way to purify water, but has also been the subject of many discussions due to the water wasted during production. The Kwik-Change™ drinking water system provides safe, high quality drinking water without a storage tank or wasted water going to drain.

---

### **Features**

- Space saver design
  - Kwik-Change™ Filters
  - No Wasted water
  - 10", 11", 13" (254, 279, 330mm) length cartridges
